

Cable hangers are devices designed to hold, organize, and secure different types of cables. Traditional hanger solutions come in a variety of forms and sizes, each tailored to a specific cable size or cable type. In a complex telecommunication system where various types of cables in different sizes are used, choosing and installing the right hanger could be a headache.

UNIVERSAL CUSHION HANGER SOLUTIONS

DESIGNED TO MOUNT A WIDE RANGE OF CABLE SIZES IN A SINGLE CUSHION WITH SINGLE ATTACHMENT POINT.

The universal cushion hanger solution is designed to solve this problem. A universal cushion hanger consists of a single rubber cushion and a clamp to hold the cable and this cushion. The unique cushion design allows it to accommodate a wide range of cable sizes and be installed utilizing popular cable clamps, including snap-in, butterfly, clip-on, stackable clamps, and cable blocks. The universal cushions are available in multiple sizes that meet what the industry demands for the installation of all fiber, power, hybrid, and coaxial cable with an outer diameter up to 1-1/4". This universal cushion hanger solution is durable in extreme temperatures and harsh environmental conditions thanks to the UV-resistant EPDM rubber used in the cushions and the stainless steel used in the clamps.

Compared to traditional hangers, this universal cushion hanger solution simplifies the ordering process, inventory, and installation by reducing the product variety and improving the interchangeability of the cushions and clamps. In addition, cushion hanger solutions not only hold the cable securely but also absorb vibration, reduce noise, and minimize the risks of cable damage.

FEATURES / BENEFITS

- One cushion fits a wide range of cable sizes
- **Improve hanger compatibility, even non-standard cable size can be accommodated**
- Cushion made of UV-resistant EPDM
- **Durable solution even in extreme environmental conditions**
- Patented design of the cushions
- **Hold the cables securely and minimize risks of cable damage**
- Cushions are compatible to various clamps
- **Support diverse site conditions**
- Cushions and clamps are ordered separately
- **Provide flexibility in installation and inventory management**
