

Cable Re-Reeler

Job Description

RFS Technologies designs and manufactures premium-quality cable solutions for commercial wireless networks, mission critical communications, private networks, Distributed Radio Systems (DRS) and other telecom markets in North America. As an Amphenol company, we're part of a global powerhouse in high-technology, interconnect, sensor, and antenna solutions that's enabling the electronics revolution across almost every industry. Our access to Amphenol's innovations and resources means we are uniquely positioned to deliver the end-to-end wireless connectivity solutions you need, when and where you need them.

POSITION SUMMARY

The Cable Re-Reeler will be a part of the Cable Finish group, responsible for re-reeling bulk cable.

ESSENTIAL JOB FUNCTIONS

- Perform activities under direction of the shift supervisor.
- Perform a sequence of operations to accomplish timely re-reeling of bulk cable to customer order lengths.
- Convert customer order lengths from feet to meters.
- Locate proper reels in storage area and move to line area using material handling equipment (Forklift, pallet jack or hand truck) as necessary.
- Ability to mount reel and mount take-up reel.
- Perform cable management activities to ensure proper cable coiling onto reels. Monitor cable to take-up reel, hand guiding on take-up as necessary.
- Manage take up reel change outs; cut cable, secure to reel, swap reels.
- Deliver completed reel to next destination.

SKILLS, KNOWLEDGE, AND ABILITIES

- Able to follow verbal and written instructions with minimal supervision
- Requires reading, writing, math (including metric conversions using multiplication and division)
- Solid initiative; requires the use of judgment to comply with instructions and standard procedures involving the making of minor decisions
- Experience in forklift operation preferred
- Previous manufacturing experience a plus

EDUCATION

- High School Diploma/GED desired
