

RFS Technologies
an Amphenol Company

Quality Policy

May 15, 2023

RFS Technologies designs and manufactures premium-quality cable and antenna solutions for commercial wireless networks, mission critical communications, private networks, Distributed RFS Technologies and other telecom markets in North America.

At RFS Technologies, we put the customer at the heart of every process within our operations. We provide high quality, reliable and environmentally friendly products; we constantly strive for excellence in meeting our commitments and customers' expectations.

We are strongly committed to:

- Measuring Quality and Environmental performance and driving continual improvement in our processes and those of our supply partners.
- Facing and addressing issues in a timely manner by looking for best-in-class practices.
- Leveraging our global organization strengths by delivering reliable service and customer support in all regions of the world.
- Anticipating customer needs by offering innovative product and services.
- Conducting business with high standards of integrity, adherence to compliance obligations and with regard to corporate social responsibility.

The Management team is committed to providing a workplace that fosters a culture of innovation and continual improvement, where quality and environmental protection are the results of each employee's daily engagement for the benefit of our customers and the environment in which we are living.

This policy will be regularly reviewed, updated as necessary, communicated, and applied to all employees and persons working for or on behalf of RFS Technologies, and made available to the interested parties.
