

This antenna is an excellent choice for 3G, PCS and LTE1800 where high gain is required.

FEATURES / BENEFITS

- High gain performance — improves coverage
- Variable electrical downtilt — provides enhanced precision in controlling intercell interference.
The tilt is infield adjustable 0-10 deg.
- High suppression of upper sidelobes (typically 18 dB) — reduces cell interference
- Optional remote tilt — can be retrofitted
- Low profile — decreases visual impact
- Quick and easy to install — saves time and money
