

RFS' HYBRIFLEX™ cabling solution for Remote Radio Head (RRU) combines optical fiber and DC power for RRUs in a single lightweight aluminum corrugated cable, making it the world's most innovative solution for RRH deployments. It was developed to reduce installation complexity and cost at Cellular sites.

The **HYBRIFLEX™** hybrid cable family is now supplemented by two new members: The Fiber Optic trunk cable and the DC trunk cable available in a large variety of fiber counts, DC counts and DC cross sections.

The armored F/O trunk cable is part of the cabling solution for RRU's meant to build the F/O connection from the bottom patch panel to the Distribution Box near the RRU. It consists of a jacketed part of length XXX, a breakout part with a Compact Distributor and a breakout part to the BBU side. The F/O trunk cables can be ordered from 10m up to 120m in increments of 10 m jacketed length.

FEATURES / BENEFITS

- Halogen-free and flame-retardant cable jacket material (CPR)
- Multifunctional E-glass yarns as strain relief elements and non-metallic rodent protection
- High class F/O performance
- IP 68 Connector sealing
- IP 67 Assembly sealing
